

Always In Short

Consecutive Bear Bars: One Is Big so Always In Short

Consecutive Bear Bars: One Is Big so Always In Short

Consecutive bear bars on the open with one being big
and closing near its L so Always In Short
S below L of 2nd bar, but S signal did not trigger
Reversed up so S Climax and bear trap
50% of strong moves on the open reverse

Always In Short: If Exit, S below Bear Bar Closing near Its L

Always In Short means lower prices are likely before the market goes above top of the leg
Sometimes one big bear bar is enough
But traders usually want the next bar to not have a bull body (the follow-through bar)
When the bars are not especially big, like here, some traders will need 3 or more bear bars, especially closing near their lows, before concluding a bear trend is likely beginning

Always In Short: B Setups Are Low Probability

Always In Short: If Exit, S again below Bear Bar in PB

Trail stop down to above most recent major lower high
after every strong bear BO

Broad Bear Channel

If Always In Bears exit on reversal up,
but still Always In Short (AIS),

S again below good bear bar, especially if 2nd S signal

Good bear bar means C below midpoint and not big tail below

Always In Short: After Bull Trap on Open

Opening Reversal Down
DT bear flag after failed reversal up

Lots of bull bars in 20 bar Tight TR,
but small bars and could not get above EMA
Never became Always In Long again
DT Bear flag, then Small PB Bear Trend

Opening Reversal Up
Wedge bull flag

Surprise Bear Bar
Bear BO below bull flag
Always In Short

Always In Short: From 1 Huge Bear Bar

Surprisingly huge bear bar

Always In Short based on 1 bar

Odds favor at least one more leg down

S below bear bar

Always In Short: From 1 Big Bear Bar

Always In Short: From 4 Small Bear Bars

Always In Short: Still above EMA

Failed BO above yesterday's H
ioi so 2nd S signal

Big bear bar closing near its L
S reversal down

Became Always In Short by 2nd or 3rd bear bar,
Even though still above EMA
