

Bear BO

Bear BO: Every Bear Trend Bar or Series of Bear Bars Is a BO

Bear BO is one or more consecutive bear trend bars

Every bear trend bar is a BO

To use the term "BO," want close of bear bar to be near L of bar and below L of prior bar or bars

Need gap between C of BO bar and L and bottom of body or prior bars
BO usually fails, as seen on this chart

"Successful" bear BO has a 2nd leg down
The 2nd leg is usually also a BO
and typically goes low enough for swing trade
Usually reaches some type of MM,
like based on height of bodies in BO or height of TR

Confirmed Bear Breakout: Consecutive Big Bear Bars

Consecutive big bear bars closing near their lows and far below EMA and Trading Range

Possible Measuring Gap

After long Trading Range,
bear trend will probably not last all day

Bear BO: One Huge Bear Bar Can Be Successful BO

S The Close bear trend so S below bear bar closing near its L

Small PB Bear Trend: Late Start, but Strong Bear Trend
