

Buy The Close in TR
so Better to Sell Close
of Bull Bars

BTC in TR: Better to Fade (Sell High, Buy Low)

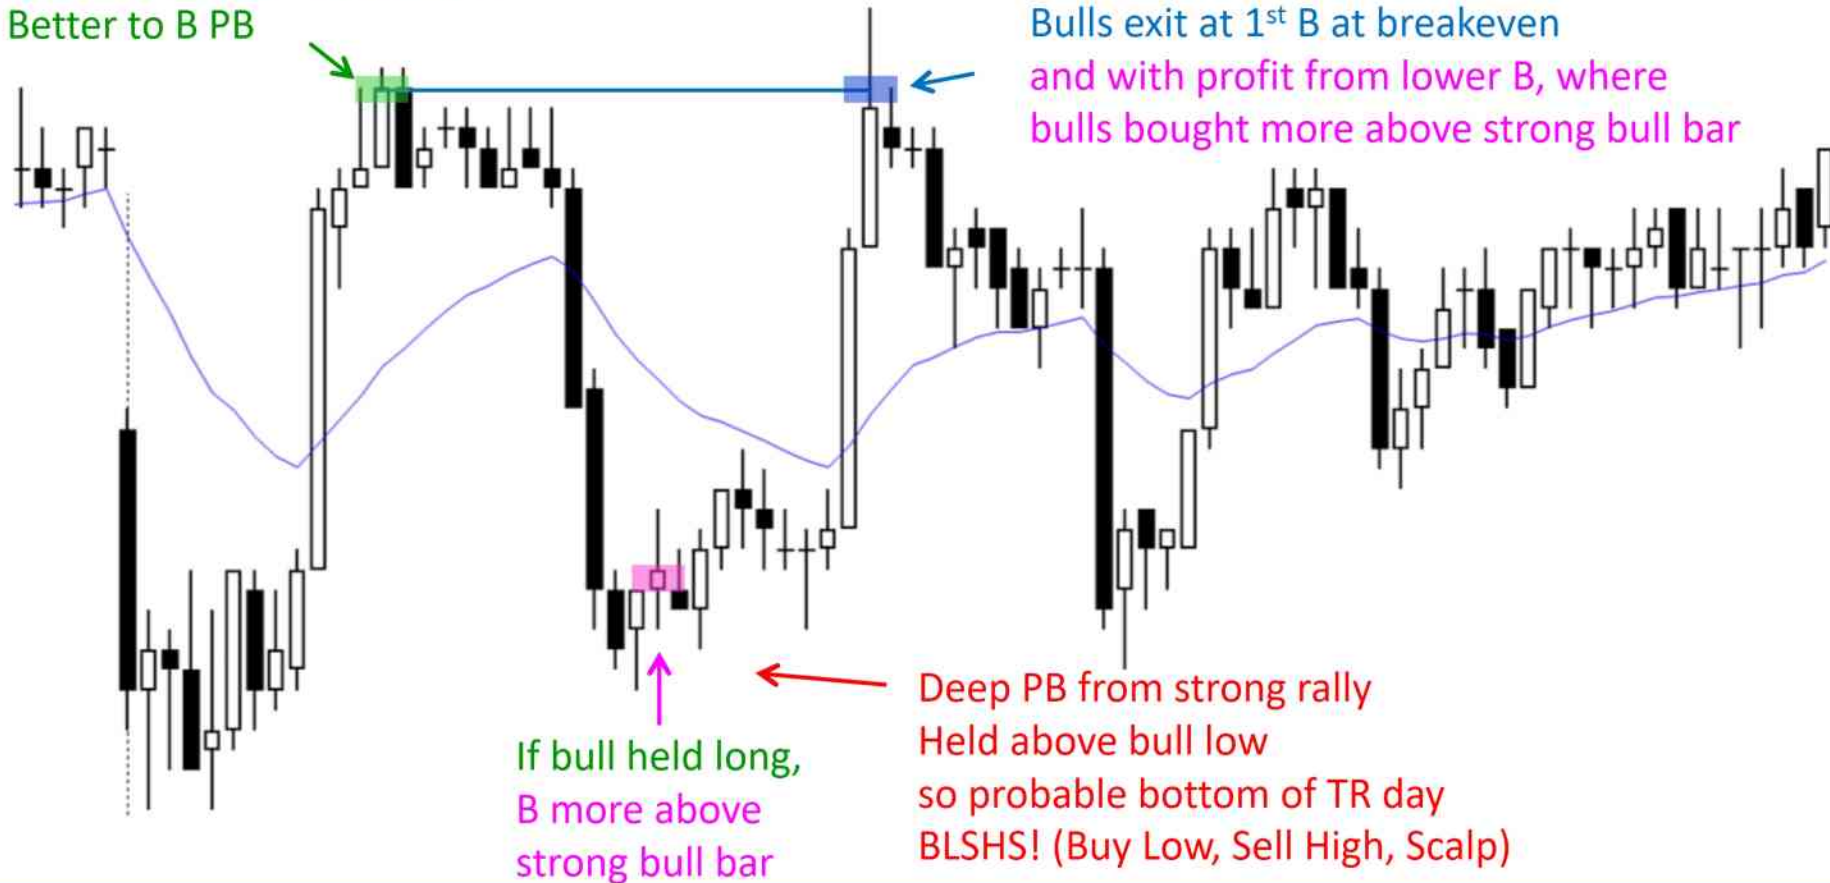

If Buy Top of TR: Need Wide Stops and Scale In (Better to Fade)

BTC, but micro DT at prior H

Better to B PB

Bulls exit at 1st B at breakeven

and with profit from lower B, where
bulls bought more above strong bull bar

BTC in TR: B Bear C, S Bull Close

6 bar Buy The Close rally

Better to not B here since testing prior LH after strong selloff and TR likely

Better to either B PB (or, after strong BO above H of day = not today)
