

Bar Counting

H1 and H2 B Setups: PB in Bull Trend or TR

If bears twice try to selloff and fail, they will give up

Creates **High 2 Bull Flag**

B above bull bar, since bears exiting with loss

If 1st move up fails
and there is a 2nd entry,
the PB is a H2 bull flag

Every DB is H2
H3 = triangle or wedge

H1, H2, and H3 are pullbacks in bull trend or TR
Beginners should look for strong bull trend

In past 15 bars, better if
no more than 1 close below EMA

Higher probability of profit when buying
above bull bar that closes near its high

High 3 Bull Flag: Wedge When Tilted Down

High 3 Bull Flag: Wedge or Triangle

Low 1 and Low 2 in Bear Trend or TR: S below Bear Bar

Triangle or Wedge in Bear: Low 3 Bear Flag

Consecutive Complex Bottoms: Two Legs Up Likely

Consecutive Low 2 Tops: Low 4 Top

Consecutive Tops: Wedge, Then Low 2

Consecutive Complex Tops

Wedge top, then Low 2 top
(here, formed Low 4 top)

Low 4: Expect 2 Legs and 10 Bars Sideways to Down
